

Social Responsibility

Hidung Merah Circus

Yayasan Hidung Merah - Hidung Merah [Hidung Merah stands for red nose] is a social outreach program that strives to improve the quality of life for Indonesia's disadvantaged children. YHM uses circus arts and clowns as the vehicle through which children are taught fundamental lessons such as self-esteem, trust, teamwork and perseverance. The foundation strives to be the pioneering force behind creative education advocacy and rehabilitation, and offers a safe place for children to explore, experiment and be educated. Currently they work with 240 children and are offering over 75 hours of education and arts classes each week. Since 2008, the program has affected over 75,000 children across Indonesia.
